Anemanthele Buffalo's Gold ^{NEW}
Foliage turns from green towards gold bronze. Erect habit with slightly pendulous tussock. Sow early February for June-Oct sales. Height: 2 ft. Zones: 6-8. **A**

Briza maxima
(Quaking Grass). An annual cut flower, 20 in. tall. Flower resembles a shrimp or tail of rattle snakes. Does best when direct sown. **B**

Briza minima
(Short Quaking Grass). Annual cut flower, direct sow. Height: 10-14 in.

Carex comans Amazon Mist
Pot Height: 8 in. Garden Height: 10 in. Zones: 7-9. **C**

Carex comans Bronco
Pot Height: 8 in. Garden Height: 10 in. Zones: 7-9. **D**

Carex flagellifera Bronzita
Pot Height: 8 in. Garden Height: 16 in. Zones: 7-9. **E**

Carex Coppertop
Pot Height: 10 in. Garden Height: 24 in. Zone: 7. **F**

Carex testacea Prairie Fire
Pot Height: 8 in. Garden Height: 16 in. Zones: 6-10. **G**

Carex buchananii Red Rooster
Pot Height: 12 in. Garden Height: 24 in. Zones: 7-9. **H**

Cortaderia selloana
(Pampas Grass). Tender perennial for cut 6-10 ft. tall plants produce large silky, feathery plumes 12 in. long. Very popular. Will be shorter in Northern areas. Zones: 7-10
Pink Feather White Feather

Corynephorus canescens Spiky Blue
Pot Height: 6 in. Zones: 7-9. **I**

Deschampsia elongata Zephyr ^{NEW}
Produces a small mound of dainty, fine textured green grass. Height: 6-8 in. Zone: 7. **J**

Eragrostis Rubysilk
(Teff Grass). A clump-forming, annual grass that grows up to 36 in. tall with slender, glossy, dark red open panicles. After harvest, it will flush again. Use as fresh cuts or dried. **K**

Eragrostis elliotii Wind Dancer
(Love Grass). Native American grass, graceful form with narrow, bluish-green foliage. Airy flower plumes begin appearing in July, maturing to a tan color in August and gradually to a lighter straw color in the fall. Maintains interest throughout the winter, drought tolerant, and not invasive. Height: 3-4 in. Zones: 6-9. Multi-seed Pellet. **L**

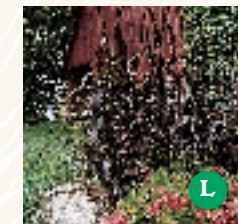

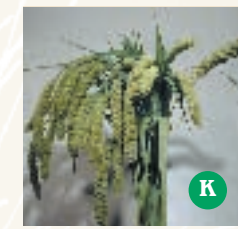

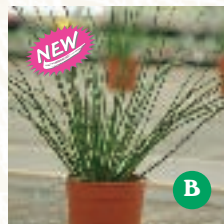

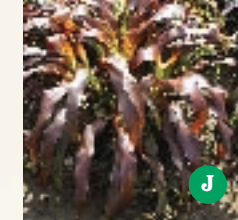

Festuca amethystina
(Amethyst Fescue). Attractive perennial for garden and container use.

Festuca cinera Festina
(Blue Fescue). Pot Height: 6 in. Garden Height: 10 in. Zones: 4-10. **M**

Festuca glauca
(Blue Fescue). Perennial for rock gardens and border plantings. Tufts of silvery blue thread-like leaves. Height: 6-12 in. **N**

Isolepis cernua Live Wire ^{NEW}
(Fiber Optic Grass). A unique looking grass for mixed containers or as a gift plant. Flowers look like fiber optic strands. Dense, mounded habit without pinching or PGRs. Best in packs, 4 in, 6 in. Multi Seeded Pellet. **O**

Juncus effusus Spiralis ^{NEW}
Upright twisted leaves. Interesting texture for containers and landscape. Height: 19 in. **P**

Juncus inflexus Blue Arrows ^{NEW}
Stiff upright blue green foliage. Can be grown as a pond plant, but is drought tolerant when grown in ground. Height: 3 ft. Zone: 5-9. **A**

Juncus pallidus Javelin ^{NEW}
Tall stately green grass. Rugged plant can grow in standing water, but handles heat and drought. Straw color winter interest. Height: 4-5 ft. **B**

Juncus tenuis Blue Dart ^{NEW}
Linear, blue foliage with strong vertical habit. Alternative to dracaena. Height: 14-16 in. Zone: 5. **C**

Juncus Quickmix Twisted Arrows ^{NEW}
Each pellet includes Blue Arrows and Spiralis. **D**

Juncus Starhead ^{NEW}
Foliage is green with dark green star inflorescence. Height: 10 in. Pelleted Seed.

Koeleria glauca Blue Sprite ^{NEW}
Small blue green ball of foliage topped by wheat like plumes. Height: 6-8 in. Zones 5-9. **E**

Koeleria glauca Coolio
Pot Height: 4 in. Garden Height: 8 in. Zones 6-9. **F**

Lagurus ovatus (Hares Tail Grass)
Annual for garden and cut-dried arranging. Velvety foliage and plumes. Blooms in 14-16 weeks from early April sowing. Height: 16-18 ft. **G**

Luzula nivea Lucius
Pot Height: 6 in. Garden Height: 24 in. Zones: 6-10. **H**

Luzula nivea Starmaker
Pot Height: 6 in. Garden Height: 2 ft. **I**

Millet Pennisetum Jester
Mature height is approximately 3/4 of the height of Purple Majesty, with wider leaves and more basal branches. Plants spike and develop seed slightly later than Purple Majesty. Well suited to containers, gardens and mass plantings. Height: 3 1/2 ft. **J**

Millet Limelight
Spray Millet. A long arching light green seed head, if dried with heat. Great fresh cut with a long harvest. **K**

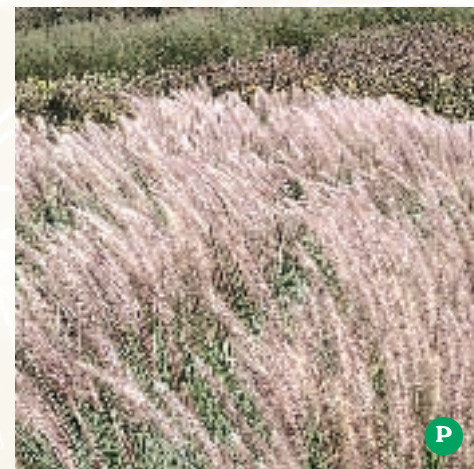

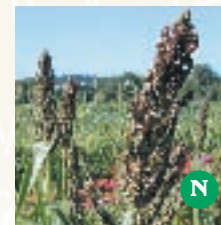

Millet Pennisetum Purple Majesty
AAS Winner. Striking corn-like plant with deep purple foliage, stems, and flower plumes. Cat-tail like flowering plumes are 12-14 in. long. The more sun, the deeper the foliage color and the narrower the leaves. Suited for 4 in. pots to gallon containers. Height: 4-5 ft. **L**

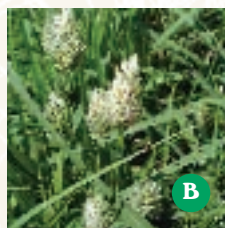

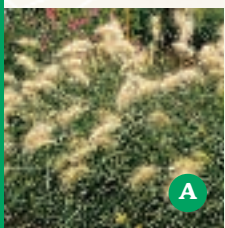

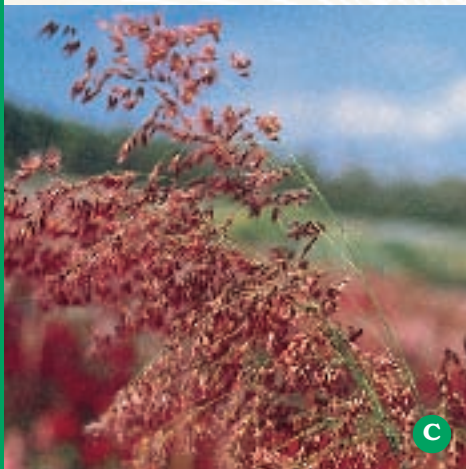

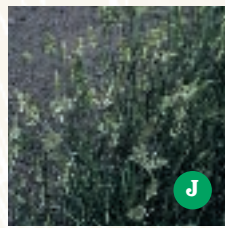

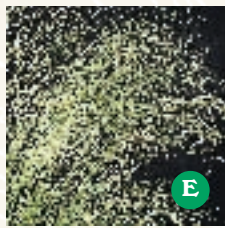

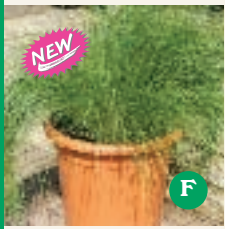

Millet Purple Mist
German Millet. Easy annual that produces a slender, head with purplish color. Use as fresh cut and dried. Height to 36 in. **M**

Millet Tapestry
Grey/green/purplish seed head that is semi-open. Direct seed. Use as fresh cut or dried. **N**

Panicum Frosted Explosion ^{NEW}
Exciting new bouquet filler. High germination, good uniformity, and high production rate per plant. For field or greenhouse production. **O**

Pennisetum setaceum rueppelii (Crimson Fountain Grass)
A tender perennial usually grown as annual in the North. Perennial in zones 8 & 9. Lovely 3-4 ft. stems topped with wispy 6 in. rosy-purple plumes. Very desirable for fresh and dried arrangements. Best to cut stems before they set seed, to prevent self-sowing. **P**

Pennisetum villosum

(Feathertop). A tender perennial which produces its plump creamy white 4 in. plumes on 2 1/2-3 ft. tall plants. Best when ground is irrigated or very lightly sprayed overhead. Does not hold up well under heavy overhead watering. **A**

Phalaris canariensis

(Canary Grass). An annual ideal for cut-dried arrangements. Green seed heads make fine fresh cut material while brown dried seed heads can be dyed or used naturally in autumn arrangements. Sow in April, transplant to garden in May. Plants will bloom June/July. **B**

Rhynchelytrum repens

Ruby red panicles (flower clusters) make an attractive and unusual filler. Early March sowing blooms June till fall. Makes a unique splash of color to annual and perennial landscapes. For fall bloom. Can be direct sown in field after frost danger is past. Space 10 x 11 in. Will tolerate growing on temperatures of 50°-54°F. **C**

Stipa arundinacea Sirocco NEW

Only pink grass from seed. Turns shades of copper and pink in cool conditions. Height: 12-14 in. Zone: 6. **D**

Stipa barbata

(Silverfeather). Attractive perennial which averages 3 ft. tall with long silvery-white feathered bars. A very useful cut flower.

Stipa capillata

(Bridal Veil). A perennial which averages 4 ft. in height and produces lacy, wisp branches ideal for cut design work. **E**

Stipa lessingiana Capriccio NEW

Wispy fine textured green grass, soft to the touch. Height: 14-16 in. Zone: 6. **F**

Stipa pennata

(Feather Grass). A perennial which produces 2 1/2 ft. tall plants topped with long silvery-barbed plumes. Very attractive. **G**

Stipa tenuissima Pony Tails

Pot Height: 10 in. Garden Height: 14 in. Zones: 6-10. **H**

Uncinia Firedance

Pot Height: 6 in. Garden Height: 12 in. Zone: 8. **I**

Wangenheimia lima Vulcan

For cut and dry flower uses. Best sown direct in rows with a distance of 16 in. Flower heads are flat-shaped and best harvested just before pollen production starts. Sowing in plugs and potting in 5-6 in. pots results in flowering pot plants. Transplanting reduces total length of the plants. 80-100 days. Height: 24-28 in. **J**
